

EDUCATION

Master of Science in Business Analytics | University of California, San Diego, CA 06/2026

- *Relevant Coursework:* GenAI for Business, Recommender Systems, Pricing Methods, Customer Analytics, Marketing

Bachelor of Science in Mathematics & Economics | University of California, San Diego, CA 06/2019

- *Relevant Coursework:* Numerical Analysis, Linear Algebra, Econometrics, Microeconomics, Operations Research

EXPERIENCE

Competitive Running (Sub-Elite) | San Francisco, CA 01/2022 - Present

- Competing at the sub-elite level with multiple top-10 finishes across various distances.
- Earned prize winnings and secured brand partnerships (Under Armour & GU Energy).

Personal Leave - Caregiving | San Francisco, CA 07/2023 - 09/2024

- Took temporary leave to provide caregiving support for an ill friend while exploring opportunities within the running industry.

Analyst - Revenue Strategy & Operations | OpenTable | San Francisco, CA 09/2022 - 06/2023

- Delivered \$3M+ in revenue impact through data-backed GTM strategy recommendations by analyzing data via SQL, Preset and Excel; presented insights to leadership to inform OKRs and market planning.
- Built pricing and revenue forecasting models to identify high-traffic but under-monetized restaurants, enabling Sales to increase yield by 4%.
- Designed diner-side incentive programs in partnership with Analytics, Product, & Marketing to shift booking behavior toward monetized channels for 5 major markets.
- Set up TAM analysis dashboards to identify high-impact restaurant groups, resulting in key customer acquisitions.

Demand Planning Analyst - Strategy & Operations | Gopuff | San Francisco, CA 01/2022 - 07/2022

- Partnered with Data Science, Product, and Supply Chain to implement a forecast system across 500+ fulfillment centers and 5,000+ SKUs, reducing out-of-stocks (OOS) and enhancing forecast accuracy.
- Built automated dashboards and SQL-based reporting in Sigma to access item-level forecast monitoring, improving visibility into overstock trends and cutting operating expenses.
- Led planning and analysis for a national promo, managing inventory allocations across hundreds of locations; maintained 3% OOS rates and drove up order volume, with post-event analysis used to refine planning processes.
- Centralized promotional performance data with Product and Marketing, enhancing seasonal promo planning.

GTM Analyst - Revenue Strategy & Operations | Compass | San Francisco, CA 08/2020 - 01/2022

- Structured complex deals and policies to reduce post-IPO financial risk, increase renewal win-back rates, and drive growth; influenced ~\$10M in incremental revenue and presented results org-wide.
- Partnered with Customer Success and Engineering, post-M&A, to audit and unlock 200+ agent deal contracts, resolving technical workflows, data quality issues, and enabling faster renewal processing for acquired brokerages.
- Designed and rolled out a standardized Renewals deal sheet and dashboard with KPI tracking. Raised deal quality, forecast consistency, improved retention through analysis, and led training for 100+ team members.
- Scaled up the Growth commissions engine, while cutting processing time by 33%.

Data Analyst Intern - Product & Engineering | Intel | Santa Clara, CA 07/2018 - 09/2018

- Developed a scoring mechanism and microprocessor optimization analysis for several engineering teams.

Projects & Specialized Skills

- **Intuit Quickbooks Upsell Targeting:** Built an ensemble of logistic regression, random forest, XGBoost, and MLP models to identify the highest-value businesses to target in a direct mail campaign; ranked 2nd out of all teams in a cohort-wide leader board with ~\$500K in out-of-sample profit.
- **Uber Price Elasticity via NYC Congestion Pricing:** Leveraged NYC's 2025 congestion pricing policy as a natural experiment to estimate Uber's price elasticity using 2SLS regression on trip-level data; found highly inelastic demand and recommended a targeted 3–7% base fare increase projected to yield a 3–14% revenue uplift.
- **Tools:** Excel, Google Sheets, SQL (Snowflake), Python, Looker, Preset, Tableau, Sigma, Salesforce, ChatGPT, Claude.
